JOURNAL OF CHEMICAL TECHNOLOGY AND BIOTECHNOLOGY

Contents of volume 74

ISSUE 1

Acknowledgement 1

Comment

'Clean-Process Biotechnology' aimed at retaining bioactive components in foods
A Wiseman, T Ridgway and H Wiseman (UK) 3

Papers

Effect of dissolved oxygen tension and pH on the production of extracellular protease from a new isolate of *Bacillus subtilis* K2, for use in leather processing
A Hameed (Pakistan), T Keshavarz and C S Evans (UK) 5

Biofiltration control of pulping odours – hydrogen sulfide: performance, macrokinetics, and coexistence effects of organo-sulfur species
A H Wani, A K Lau and R M R Branion (Canada) 9

Measurement of native dextran synthesis and sedimentation properties by analytical ultracentrifugation
S J Setford (UK) 17

Thermostability of modified enzymes: a detailed study
M A Longo and D Combes (France) 25

Differentiation of pH and free lactic acid effects on the various growth and production phases of *Lactobacillus helveticus*
A Amrane and Y Prigent (France) 33

Studies of viscosity build-up properties of sodium alcohol ether sulphates
W Hreczuch, K Rolnik, J Szymanowski and W Apostoluk (Poland) 41

Removal of linuron from water by natural and activated bentonite
E González-Pradas, M Villafranca-Sáchez, A Gallego-Campo, D Ureña-Amate and M Fernández-Pérez (Spain) 49

A pseudo first order rate model for the adsorption of an organic adsorbate in aqueous solution
P H Y Li, R L Bruce and M D Hobday (Australia) 55

The gas phase hydrodechlorination of chlorobenzene over nickel/silica
G Tavoularis and M A Keane (UK) 60

Continuous fixed bed biosorption of Cu^{2+} ions: application of a simple two parameter mathematical model
J M Brady, J M Tobin (Ireland) and J-C Roux (France) 71

Mathematical analyis of proportional-integral control for fixed bed bioreactors
J Alvarez-Ramirez, M Meraz and O Monroy (Mexico) 78

© 1999 Society of Chemical Industry.

Calendar of meetings 85

Instructions to authors of papers 1999 87

Papers published in volumes 71–73 91

ISSUE 2

Review

New reagents or new ways with old reagents
D S Flett (UK) 99

Papers

Screening and selection of microfungi for microbial biomass protein production and water reclamation from starch processing wastewater
B Jin, J van Leeuwen, Q Yu and B Patel (Australia) 106

Mechanisms of Cr(VI) removal from water by various types of activated carbons
C Selomulya, V Meeyoo and R Amal (Australia) 111

Liquid-phase adsorption of phenol by activated carbons prepared from bituminous coals with different oxygen contents
H Teng and C-T Hsieh (Taiwan) 123

Production of lactic acid from beet molasses by calcium alginate immobilized *Lactobacillus delbrueckii* IFO 3202
Y Göksungur and U Güvenç (Turkey) 131

Influence of growth medium composition on the lipolytic enzyme activity of *Ophiostoma piliferum* (Cartapip^{TM})
E George, C Tamerler (UK), A Martinez, M J Martinez (Spain) and T Keshavarz (UK) . . 137

Preliminary study on products distribution in alcohol pulping of *Eucalyptus globulus*
J I Botello, M A Gilarranz, F Rodríguez and M Oliet (Spain) 141

Inactivation of microorganisms in a flow-through photoreactor with an immobilized TiO_2 layer
L Belháčová, J Krýsa, J Geryk and J Jirkovský (Czech Republic) 149

Etherification rates of 2-methyl-2-butene and 2-methyl-1-butene with ethanol for environmentally clean gasoline production
N Oktar, K Mürtezaoğlu, G Doğu, I Gönderten and T Doğu (Turkey) 155

A kinetic study of the oxidation of phenol, *o*-chlorophenol and catechol by hydrogen peroxide between 298 K: and 333 K: the effect of pH, temperature and ratio of oxidant to substrate
A K De, B Chaudhuri and S Bhattacharjee (India) 162

Fluidized tube heat exchanger
F F Ar and B Z Uysal (Turkey) 169

Dynamic modelling, simulation and optimization of an extractive continuous alcoholic fermentation process
F L Honorato da Silva, M I Rodrigues and F Maugeri (Brazil) 176

Kinetic study on the esterification of geraniol and acetic acid in organic solvents using surfactant-coated lipase
S-Y Huang and H-L Chang (Taiwan) 183

Calendar of meetings 188

ISSUE 3

Introduction
D L Pyle 191

Papers presented at the 4th International Conference on Separations for Biotechnology, University of Reading, UK, 29–31 March 1999

Investigation of single protein adsorption on ion exchangers using confocal laser scanning microscopy
M Ahmed and D L Pyle (UK) 193

Adsorption isotherms of the *Aspergillus niger* glucoamylases I and II on the anionic exchanger DEAE-Toyopearl 650
R Soriano, L F Bautista, M Martínez and J Aracil (Spain) 199

A scale-down study into the chromatography of a peptide using the cation-exchange cellulose, Express-Ion C
P R Levison, M Streater and J W Dennis (UK) 204

Direct process integeration of cell disruption and fluidised bed adsorption for the recovery of intracellular proteins
H Bierau, Z Zhang and A Lyddiatt (UK) 208

Azeotropic phenomena during separation of dilute mixtures of proteins by simulated moving bed chromatography
J Houwing, H A H Billiet, H A Wesselingh and L A M van der Wielen (Netherlands) 213

The adsorption kinetics of cephalosporin-c on non-ionic polymeric macropore Amberlite XAD-16 resin
S A Yang and D L Pyle (UK) 216

Protein extraction using sugar ester reverse micelles
K Naoe, M Nishino, T Ohsa, M Kawagoe and M Imai (Japan) 221

Enhanced recovery and catalytic activity of *Rhizopus delemar* lipase in an AOT microemulsion system with guanidine hydrochloride
K Nagayama, R Nishimura, T Doi and M Imai (Japan) 227

Colloidal gas aphrons generated from the anionic surfactant AOT for the separation of proteins from aqueous solution
M J Noble and J Varley (UK) 231

Purification of recombinant proteins using thermoseparating aqueous two-phase system and polymer recycling
J Persson, L Nyström, H Ageland and F Tjerneld (Sweden) 238

Flooding characteristics of aqueous two-phase systems in a countercurrent sieve-plate column
A Hamidi, M van Berlo, K Ch A M Luyben and L A M van der Wielen (Netherlands) 244

Processing of nanoparticulate bioproducts: application and optimisation of aqueous two-phase systems
S G Walker and A Lyddiatt (UK) 250

Optimization and design considerations of two-phase continuous protein separation
E Huenupi, A Gomez, B A Andrews and J A Asenjo (Chile) 256

Monitoring of adsorbate breakthrough curves within an expanded bed adsorption column
L J Bruce, R H Clemmitt, D C Nash and H A Chase (UK) 264

Magnetically stabilised fluidised bed adsorption: practical benefit of uncoupling bed expansion from fluid velocities in the purification of a recombinant protein from *Escherichia coli*
Z Zhang, D A O'Sullivan and A Lyddiatt (UK) 270

On the generalization of thermodynamic properties for selection of bioseparation processes
L A M van der Wielen and E S J Rudolph (Netherlands) 275

Process integration of cell disruption and aqueous two-phase extraction
Z-G Su and X-L Feng (PR China) 284

Simulation and optimisation of integrated bioprocesses: a case study
Y H Zhou and N J Titchener-Hooker (UK) 289

An Expert System for selection of protein purification processes: experimental validation
M E Lienqueo, J C Salgado and J A Asenjo (Chile) 293

Calendar of meetings 300

ISSUE 4

Papers

Removal of aqueous phenol and 2-chlorophenol with purified soybean peroxidase and raw soybean hulls
C Flock, A Bassi and M Gijzen (Canada) 303

Solvent extraction of gold by LIX 79: experimental equilibrium study
A M Sastre, A Madi, J L Cortina and F J Alguacil (Spain) 310

Deactivation by coke of a catalyst based on a SAPO-34 in the transformation of methanol into olefins
A T Aguayo, A E Sánchez del Campo, A G Gayubo, A Tarrío and J Bilbao (Spain) 315

On the kinetics of magnesia hydration in magnesium acetate solutions
D Filippou, N Katiforis, N Papassiopi and K Adam (Greece) 322

The effect of commercial carbon de-ashing on its thermal stability and porosity
G Rychlicki, A P Terzyk and W Majchrzycki (Poland) 329

Removal of diazo and triphenylmethane dyes from aqueous solutions through an adsorption process
M Sankar, G Sekaran, S Sadulla and T Ramasami (India) 337

Corrosion inhibition by *N*-(alkyloxycarbonylmethyl)-*N*-triethanol ammonium chloride with respect to the surface and thermodynamic properties
E A M Gad, Z Abdel-Hamid, D A Ismail and R A El-Adly (Egypt) 345

Photodegradation of the textile dye Reactive Black 5 in the presence of semiconducting oxides
I Poulios and I Tsachpinis (Greece) 349

Synthesis of molecular sieves from Chilean kaolinites: 1. Synthesis of NaA type zeolites
V Sanhueza, U Kelm and R Cid (Chile) 358

Comparison of prednisolone production from cortexolone by free and immobilized isolated and standard collection strains using mixed culture techniques
J Manosroi. A Manosroi, A Saraphanchotiwittaya (Thailand) and M Abe (Japan) 364

Extended Summaries: Joint Meeting of the Environmental Biotechnology, the Biotechnology and the Food Commodities and Ingredients Groups of the SCI, the Industrial Biochemistry and Biotechnology Group of the Biochemical Society and the Process Technology Group of the Royal Society of Chemistry: 'Improving the nutritional and technological functionalities of foods using clean-process biotechnology'

Introduction
T Ridgway and A Wiseman (UK) 371

Introduction: Future 'enzymes-by-design' to control food-functionality
A Wiseman (UK) 371

Bioactive components of foods
H Wiseman (UK) 371

Added enzymes in food production
L F J Woods (UK) 372

Food enzymes and biotechnology
P Goodenough (UK) 373

The role and manipulation of enzymes in development of tomato flavour
A J Taylor (UK) 374

Cell wall degrading enzymes: manipulation for processing
G A Tucker (UK) 374

Introduction: 'Clean and healthy' food processing
T Ridgway (UK) 375

Enrichment of omega-3 fatty acids using lipase technology
G P McNeill (UK) 376

The use of onion waste as a raw material for functional foods
K W Waldron and A C Smith (UK) 376

Phenols, tannins and their transformation products in beverages: implications for health
M Clifford (UK) 376

Colourants, antioxidants and phytoestrogens from apple
T Ridgway (UK) 377

Calendar of meetings 378

ISSUE 5

Review

Biological decontamination of oil spills in cold environments
R Margesin and F Schinner (Austria) 381

Papers

Hydrogen peroxide promoted wet air oxidation of phenol: influence of operating conditions and homogeneous metal catalysts
F J Rivas, S T Kolaczkowski (UK), F J Beltran (Spain) and D B McLurgh (UK) 390

Biological stereoselective reduction of 2,6- and 3,5-dimethylcyclohexanones by *Glomerella cingulata*
M Miyazawa, S Okamura and H Kameoka (Japan) 399

Production of optically pure L-valine in fluidized and packed bed reactors with immobilized L-aminoacylase
A Bódalo-Santoyo, J L Gómez-Carrasco, E Gómez-Gómez, J Bastida-Rodriguez, M F Máximo-Martín and A M Hidalgo-Montesinos (Spain) 403

The influence of system parameters on the stability of colloidal liquid aphrons
J T Scarpello and D C Stuckey (UK) 409

Preliminary studies in removing atrazine, isoproturon and imidacloprid from water by natural sepiolite
E González-Pradas, M Villafranca-Sánchez, M Socías-Viciana, M Fernández-Pérez and M D Ureña-Amate (Spain) 417

Enzymatic activity of *Chromobacterium viscosum* lipase in an AOT/Tween 85 mixed reverse micellar system
M J Hossain, T Takeyama, Y Hayashi, T Kawanishi, N Shimizu and R Nakamura (Japan) 423

Removal of toxic metals from aqueous mixtures. Part 1: Biosorption
A I Zouboulis, E G Rousou, K A Matis (Greece) and I C Hancock (UK) 429

Insight into spent caustic treatment: on wet oxidation of thiosulfate to sulfate
M V Jagushte and V V Mahajani (India) 437

A thermophilic/mesophilic dual digestion system for treating waste activated sludge
R Roberts, S Le and C F Forster (UK) 445

Sensitivity analysis on a sequencing batch reactor model. II: Effect of stoichiometric and operating parameters
A E Abasaeed (Saudi Arabia) 451

The phenomenology and the mathematical modelling of the silicone-supported chemical oxidation of aqueous sulfide to elemental sulfur by ferric sulfate
A de Smul and W Verstraete (Belgium) 456

Solvent extraction with LIX 973N for the selective separation of copper and nickel
F J Alguacil and A Cobo (Spain) 467

Book reviews 472

Calendar of meetings 475

ISSUE 6

Review

L-Fucose: occurrence, physiological role, chemical, enzymatic and microbial synthesis
P T Vanhooren and E J Vandamme (Belgium) 479

Papers

Hydrogen production during the anaerobic acidogenic conversion of glucose
C-Y Lin and R-C Chang (Taiwan) 498

Enzymatic synthesis of optically active ferrocenes by immobilized lipase from *Candida Antarctica*
T Kijima, Y Yaginuma and T Izumi (Japan) 501

Accumulation of zirconium and nickel by *Citrobacter* sp
G Basnakova and L E Macaskie (UK) 509

Characterisation of acylglycerol synthesis in aqueous foams by lipases
V M Shanmugam, P G Sasikumar and N M Rao (India) 515

Kinetic model-aided reactor design for peroxidase-catalyzed removal of phenol in the presence of polyethylene glycol
Y Wu, K E Taylor, N Biswas and J K Bewtra (Canada) 519

The effect of D-glucose on milk clotting activity of *Mucor miehei* in a chemostat with biomass retention
H Beyenal, Ş Şeker, B Salih and A Tanyolaç (Turkey) 527

Effect of complexing agents on liquid-phase adsorption and desorption of copper(II) using chitosan
R-L Tseng, F-C Wu and R-S Juang (Taiwan) 533

Factors influencing critical flux in membrane filtration of activated sludge
S S Madaeni (Iran), A G Fane and D E Wiley (Australia) 539

Selective removal of copper ions from aqueous solutions using modified silica beads impregnated with LIX 84
J-S Kim and J Yi (Korea) 544

Steady state behaviour of three phase air lift bioreactors – an integrated model and experimental verification
P Gikas and A G Livingston (UK) 551

Combined biological and chemical oxidation of ferrous sulphate using immobilized *Thiobacillus ferrooxidans*
M Nemati and C Webb (UK) 562

Recovery of microbial polysaccharides from fermentation broths by microfiltration on ceramic membranes
C Harscoat, M Y Jaffrin, P Paullier, B Courtois and J Courtois (France) 571

Growth kinetics of *Rhizopus formosa* MUCL 28422 on raw cassava flour in solid state fermentation
S C Stertz, C R Soccol (Brazil), M Raimbault (France), A Pandey (Brazil) and J A Rodriguez-Leon (Cuba) 580

On the effect of gap size between baffle outer diameter and tube inner diameter on the mixing characteristics of an oscillatory-baffled column
X Ni and C C Stevenson (UK) 587

Calendar of meetings 594

ISSUE 7

Comment

Aquatic-environment xenoestrogens and phytoestrogens: no clean ecorestoration without biointervention?
A Wiseman, P Goldfarb, T Ridgway and H Wiseman (UK) 597

Review

Utilization of genetically engineered microorganisms (GEMs) for bioremediation
C Garbisu and I Alkorta (Spain) 599

Papers

Optimisation of the enzymatic synthesis of *n*-octyl oleate with immobilised lipase in the absence of solvents
J M S Rocha, M H Gil and F A P Garcia (Portugal) 607

Solid-state fermentation of waste pomace from olive processing
M S Haddadin, S M Abdulrahim, G Y Al-Khawaldeh (Jordan) and R K Robinson (UK) . . 613

A three-phase fluidized bed reactor in the combined anaerobic/aerobic treatment of wastewater
J Yu, M Ji and P L Yue (Hong Kong) 619

Production of L-lactic acid by *Lactobacillus delbrueckii* in chemostat culture using an ion exchange resins system
J M Monteagudo and M Aldavero (Spain) 627

Stabilization of α-amylase by chemical modification with carboxymethylcellulose
R Villalonga, L Gómez, H L Ramírez and M L Villalonga (Cuba) 635

Treatment of olive mill wastewaters by ozonation, aerobic degradation and the combination of both treatments
F J Benitez, J Beltran-Heredia, J Torregrosa and J L Acero (Spain) 639

Adsorption/desorption of phenols onto granular activated carbon in a liquid–solid fluidized bed
R-C Wang and S-C Chang (Taiwan) 647

Modelling of kinetics and mass transfer in the hydrogenation of xylose over Raney nickel catalyst
J-P Mikkola, T Salmi and R Sjöholm (Finland) 655

Recovery of magnesium and protein from soy tofu whey by electrodialytic configurations
L Bazinet, D Ippersiel and F Lamarche (Canada) 663

A simplified model of peroxidase-catalyzed phenol removal from aqueous solution
I D Buchanan and J A Nicell (Canada) 669

Kinetics of addition of acrylic and methacrylic acids to epichlorohydrin in the presence of chromium(III) ethanoate
A Bukowska and W Bukowski (Poland) 675

A new pH-based procedure to model toxic effects on nitrifiers in activated sludge
K Gernaey, D Maffei, P Vanrolleghem and W Verstraete (Belgium) 679

The operational strategy of intermittent cycle extended aeration system in treating sewage
J-S Chang, A-C Chen, M-Y Hung and M Shih (Taiwan) 688

Crossflow microfiltration of a primary sewage effluent – solids retention efficiency and flux enhancement
Q Gan and S J Allen (UK) 693

Zinc and copper distribution in soils and their removal by chelating extraction
A Barona, I Aranguiz and A Elias (Spain) 700

Research Note

Effect of surfactants on α-amylase production in a solid substrate fermentation process
A P Goes and J D Sheppard (Canada) 709

Calendar of meetings 713

ISSUE 8

Review

Ionic optodes: role in fiber optic chemical sensor technology
K Langry and B Rambabu (USA) 717

Papers

Recovery of proteins and other biological compounds using fibrous materials: I. Adsorption by salt addition
LA Chen, RG Carbonell and GA Serad (USA) 733

Recovery of proteins and other biological compounds using fibrous materials: II. Flocculation by polyelectrolyte addition
LA Chen, RG Carbonell and GA Serad (USA) 740

Lipase-catalyzed enantioselective esterification of *S*(+)-naproxen ester prodrugs in cyclohexane
S-W Tsai, S-F Lin and C-S Chang (Taiwan) 751

Surface properties of emulsan-analogs
J Zhang, S-H Lee, RA Gross and D Kaplan (USA) 759

Nonlinear recursive feedback control for the regulation of substrate concentration in a fixed bed bioreactor
J González, R Aguilar, J Alvarez-Ramírez and MA Barrón (Mexico) 766

Catalytic *para*-xylene maximization: III. Hydroisomerization of *meta*-xylene on H-ZSM-5 catalysts containing different platinum contents
AK Aboul-Gheit, SM Abdel-Hamid, SZ Mohamed and DS El-Desouky (Egypt) 771

Characteristics of gold biosorption from cyanide solution
H Niu and B Volesky (Canada) 778

Kinetics and mechanism of homogeneous catalytic hydroxylation of maleic acid by hydrogen peroxide: III. Kinetics of the hydrolysis of *cis*-epoxysuccinic acid
JO Oludipe (Nigeria) 785

The effect of nitrite correction on the evaluation of the rate of nitrate utilization under anoxic conditions
S Sözen and D Orhon (Turkey) 790

Amino acid solubilization in cationic reversed micelles: factors affecting amino acid and water transfer
MM Cardoso, MJ Barradas (Portugal), KH Kroner (Germany) and JG Crespo (Portugal). 801

Synthesis of benzylpyridine using copper zeolite and irradiation – a modified method
VN Telvekar, KG Akamanchi and BA Chaudhari (India) 812

Biodegradation of 2-, 3- and 4-iodobenzoic acids
LM Freitas dos Santos, A New and M Kingswood (UK) 815

Secretion of heterologous and native proteins, growth and morphology in batch cultures of *Aspergillus niger* B1-D at varying agitation rates
A Wongwicharn, LM Harvey and B McNeil (UK) 821

Calendar of meetings. 829

ISSUE 9

Guest editorial
D Brown (UK) 833

Guest reviews – SCI Messel Scholars

Solid phase synthesis – designer linkers for combinatorial chemistry: a review
K Gordon and S Balasubramanian (UK) 835

Organometallic molecular modelling – the computational chemistry of metallocenes: a review
N Fey (UK) 852

Production and detection of short-lived metal-containing molecules in the gas phase: a review
MS Beardah and AM Ellis (UK). 863

Papers

Pentachlorophenol retention on to lignocellulosic activated carbons
R Arriagada and R García (Chile) 870

Integration of continuous biological and chemical (ozone) treatment of domestic wastewater: 1. Biodegradation and post-ozonation
FJ Beltrán, JF García-Araya and PM Álvarez (Spain). 877

Integration of continuous biological and chemical (ozone) treatment of domestic wastewater: 2. Ozonation followed by biological oxidation
FJ Beltrán, JF García-Araya and PM Álvarez (Spain) 884

Separation mechanisms of citric and itaconic acids by water-immiscible amines
E Bressler and S Braun (Israel) 891

Methane combustion on sol–gel $Rh/ZrO_2–SiO_2$ catalysts
G Pecchi, P Reyes, F Orellana (Chile), T López, R Gómez (Mexico) and JLG Fierro (Spain) 897

Retention of Cr(VI) and Hg(II) in *Eucalyptus globulus*- and peach stone-activated carbons
G Bello, R Cid, R García and R Arriagada (Chile) 904

Effect of pH, cation concentration and sorbent concentration on cadmium and copper removal by a granular activated carbon
A Seco, C Gabaldón, P Marzal and A Aucejo (Spain) 911

Book review 919

Calendar of meetings 920

ISSUE 10

Papers

Environmentally friendly liquid phase oxidation: enhanced selectivity in the aerial oxidation of alkyl aromatics, epoxidations and the Baeyer-Villiger oxidation using novel silica supported transition metal ions
IC Chisem, J Chisem, JS Rafelt, DJ Macquarrie, JH Clark and KA Utting (UK) 923

Effect of liquid volume in the gas-separator on the hydrodynamics of airlift reactors
WA Al-Masry (Saudi Arabia) 931

Evaluation of drum bioreactor performance used for decontamination of soil polluted with polycyclic aromatic hydrocarbons
SH Woo and JM Park (Korea) 937

Removal of sulphur from Assam coal by bacterial conditioning and froth flotation
C Acharya, GV Rao (India), I Twardoska (Poland), RN Kar and LB Sukla (India) 945

Anaerobic treatment of acidified and non-acidified substrata in UASB reactors
A Elías, A Barona, J Ormazabal, G Ibarra and J Caamano (Spain) 949

Role of diazotrophic bacteria in the bioremediation of crude oil-polluted soil
INE Onwurah (Nigeria) 957

Detoxification of mercury by immobilized mercuric reductase
J-S Chang, Y-P Hwang, Y-M Fong and P-J Lin (Taiwan) 965

Quick analysis of enantioselectivity by a chromatographic reactor: II. Experimental verification
J-Y Wu and S-W Liu (Taiwan) 974

Performance characteristics of novel mechanical foam breakers in a stirred tank reactor
NS Deshpande and M Barigou (UK) 979

Oxidative dehydrogenation of ethane over alkali-metal doped sulfated zirconia catalysts
S Wang, K Murata, T Hayakawa, S Hamakawa and K Suzuki (Japan) 988

Anaerobic and aerobic treatment of a simulated textile effluent
C O'Neill, FR Hawkes, SRR Esteves, DL Hawkes and SJ Wilcox (UK) 993

Short communication

Sulfur specificity in the bench-scale biological desulfurization of crude oil by *Rhodococcus* IGTS8
EN Kaufman, AP Borole, R Shong, JL Sides and C Juengst (USA) 1000

Book review 1005

Calendar of meetings 1006

ISSUE 11

Review

Colour in textile effluents – sources, measurement, discharge consents and simulation: a review
C O'Neill, FR Hawkes, DL Hawkes (UK), ND Lourenço, HM Pinheiro and W Delée (Portugal) 1009

Papers

Preparation and characterisation of a carbon adsorbent from flax shive by dehydration with sulfuric acid
M Cox, EI El-Shafey, AA Pichugin and Q Appleton (UK) 1019

Influence of phosphate and iron on the extent of calcium carbonate precipitation during anaerobic digestion
EPA van Langerak, MMH Beekmans, JJ Beun, HVM Hamelers and G Lettinga (Netherlands) 1030

The effect of activation method on the properties of pecan shell-activated carbons
MM Johns, WE Marshall and CA Toles (USA) 1037

An investigation of nutrient limitation in single (activated sewage sludge) and dual (phenol/activated sewage sludge) co-disposals with refuse
GAC Ehlers, RA Daneel and E Senior (South Africa) 1045

Simultaneous saccharification and fermentation of pretreated *Antigonum leptopus* (Linn) leaves to ethanol
SH Krishna, GV Chowdary, DS Reddy and C Ayyanna (India) 1055

Aniline and some of its derivatives as corrosion inhibitors for nickel in 1M HCl solution
EE Abd El Aal, W Zakria, A Diab and SM Abd El Haleem (Egypt) 1061

Monitoring wastewater BOD using a non-specific sensor array
RM Stuetz, S George, RA Fenner and SJ Hall (UK) 1069

Water-based non-ionic polymeric surfactants as oil spill dispersants
AM Al-Sabagh and AM Atta (Egypt) 1075

Regeneration of a catalyst based on a SAPO-34 used in the transformation of methanol into olefins
AT Aguayo, AG Gayubo, A Atutxa, M Olazar and J Bilbao (Spain) 1082

Zinc uptake by *Streptomyces rimosus* biomass using a packed-bed column
L Addour, D Belhocine, N Boudries (Algeria), Y Comeau (Canada), A Pauss (France) and N Mameri (Canada) 1089

Photocatalytic decomposition of acetaldehyde in air over titanium dioxide
J-H Xu and F Shiraishi (Japan) 1096

Mild autohydrolysis: an environmentally friendly technology for xylooligosaccharide production from wood
G Garrote, H Domínguez and JC Parajó (Spain) 1101

Stability and stabilisation of penicillin acylase
AM Azevedo, LP Fonseca and DMF Prazeres (Portugal) 1110

Utilization of peanut shells as adsorbents for selected metals
W Wafwoyo, CW Seo and WE Marshall (USA) 1117

Book review 1122

Calendar of meetings 1123

ISSUE 12

Papers

The availability and binding of heavy metals in compost derived from household waste
SM Grimes, GH Taylor and J Cooper (UK) 1125

Effect of pH, flow rate and concentration on the sorption of Pb and Cd on montmorillonite: I. Experimental
O Altin, OH Ozbelge and T Dogu (Turkey) 1131

Effect of pH, flow rate and concentration on the sorption of Pb and Cd on montmorillonite: II. Modelling
O Altin, OH Ozbelge and T Dogu (Turkey) 1139

Synthesis of glycidyl esters
A Bukowska, W Bukowski and B Mossety-Leszczak (Poland) 1145

The role of sulphate as a competitive inhibitor of enzymatically-mediated heavy metal uptake by *Citrobacter* sp: implications in the bioremediation of acid mine drainage water using biogenic phosphate precipitant
P Yong and LE Macaskie (UK) 1149

Effect of dextran polymers on the stability of soluble *Escherichia coli* penicillin G acylase
D Kazan and A Erarslan (Turkey) 1157

Rates of acetate extraction from simulated waste streams in chloromycetin production
R-S Juang and R-T Wu (Taiwan) 1165

Recovery of copper from ammoniacal/ammonium sulphate medium by LIX 54
FJ Alguacil and M Alonso (Spain) 1171

Large-scale anaerobic degradation of betaine
F Thalasso, J van der Burgt, V O'Flaherty and E Colleran (Ireland) 1176

Homogeneous liquid–liquid extraction using perfluorooctanesulfonic acid and calcium and its application to the separation and recovery of vitamin B_{12}
S Oshite and S Igarashi (Japan) 1183

Influence of anode material composition on the stability of electrochemically-prepared ferrate(VI) solutions
K Bouzek (Czech Republic), MJ Schmidt and AA Wragg (UK) 1188

Calendar of meetings 1195

Author index to volume 74 1199

Subject index to volume 74 1203

Contents of volume 74 1207
